

SHOW ME THE MONEY: INVESTMENT FLOWS FROM COUNTRY TO COUNTRY

Gross Domestic Product in terms of purchasing power parity (PPP) is a measurement of the final sales of all goods and services in a country (i.e. income). PPP tells the relative wealth of a country in terms of a designated currency (in the case of this map, USD).

Foreign direct investment (FDI) is the investment from firms to other countries in forms of mergers or aquisition of new capital. FDI can also be used as an indicator of global convergence.

*GDP (PPP) in Billions (USD)

*Foreign Direct Investment (FDI) % of GDP (PPP)

.401 - 2.1
.101 - .4
.04 - .1

750.01 - 19,000
170.01 - 750
.037 - 170

* data is 2014 data

missing countries have no data

Participation in FDI shows dedication towards the advancement of mutual economic growth in countries and technology through sharing resources. Technology (new capital) has a significant role in GDP growth as it provides efficiency for a country to reach their potential output. In a given year, FDI is a strong indicator of a country's willingness to grow.
