 utah = 601  
 alaska = 555  
 missouri = 498  
 massachusetts = 199  
 vermont = 192

Author: Helen Carter  
 Method: searched Google with "site:www.website.com fun" for each state website listed on www.usa.gov/state-travel-and-tourism. This returned the number of results which was used to show the number of times the word 'fun' appeared on these websites. This was then used as the "fun count". Some states returned government websites that were clearly not for tourists and so instead the number 1 Google hit after searching "[State name] tourism" was used. These websites were:  
 www.visitarizona.com, www.visitcalifornia.com, www.gohawaii.com, www.tnvacation.com and www.vermontvacation.com
